杨佳艺

Jiayi Yang graduated from Tianjin Academy of Fine Arts in 2021 and is currently a postgraduate student in the field of Cross-Media Art and Digital Art at Tianjin Academy of Fine Arts. I enjoy movies, music, books, and various sports. I am a researcher and creator of dynamic design, focusing on a series of issues related to technological development, such as artificial intelligence, technological changes in the era of big data, and energy issues, which bring about social structure and spiritual crisis and reconstruction. I hope to produce works that are both warm and thought-provoking, in order to stimulate public thinking and investment in the present and future, technology and art.
